

COURSES

A. Introduction

The curriculum of the international program, to a certain degree, is similar to the curriculum of regular programs. Both of the programs follow the same curriculum stipulated by the Rector's Regulation Number 17 of 2022. The new curriculum requires students to take at least 147 credits that include 20 credits of University Mandatory subject, 119 credits of Faculty Mandatory Subject, and 8 credits elective subject.

For International Program students, there are some additional courses that have to be followed: English Matriculation Program, English for Academic Purpose, IELTS Preparation, and CEPT Preparation. Students have to take these courses as part of their English capacity improvement during the study in the International Program as well as to prepare them to compete in the globalization era.
